

the 2x3 coffee table 1 sheet

this project is super-simple... that's what makes it so great.

I just got 10' 2x3's and cut them in half. If I built this project again I'd only stack the lumber 4 layers high. This could easily be made with 2x4's. to see a version made from 2x4's check out the original from "A Beautiful Mess"
